

INTRODUCING

AvMed Administrators^{INC.}

A new, more efficient and cost-effective solution for large employer groups

AvMed Administrators works with employers to deliver best-in-class self-funded programs that maximize benefits and minimize costs. We tailor our programs to meet the needs of our clients, encouraging employees to live healthier lives and helping employers maintain a healthy and productive workforce, while controlling overall costs.

In 2019, AvMed Administrators studied the claims data of a large Miami-Dade County based employer to determine if the AvMed Administrators network could produce lower medical claims costs, if all other components remained fixed. The findings indicated that by switching to AvMed Administrators, this employer would have lowered medical claims costs by 12%, which equated to approximately \$22 million in medical claims expense savings.
